Soft Glass by Tonelli Design

Soft Glass, the new and first sofa by Tonelli Design, designed by Massimo Castagna, breaks away from conventional sofa design by integrating glass as the framework for a captivating interplay of shapes and materials. This marks a significant departure from traditional upholstery, offering a fresh perspective on living space aesthetics. At first glance, *Soft Glass* mesmerises with its unconventional style, striking a delicate balance between lightness and modularity. The sofa's soft, generously filled volumes create a welcoming seating system that redefines spatial design. Castagna's vision of modular design allows for original, dynamic and informal compositions, setting new trends and even anticipating them. With its wooden slatted frame and glass bases, *Soft Glass* offers unparalleled versatility, allowing for a multitude of configurations to suit diverse preferences and spatial requirements. Whether in larger or smaller configurations, the sofa remains a statement piece
