KITCHENS...

Fantin's Frame kitchens come with two or three units and feature tops made of Barazza steel or Fenix NTM. There is a choice of a vintage or satin finish for the steel tops, which can be matched with the huge range of Fantin finishes on offer. The Fenix NTM tops are to be used with the ultra-matt finishes due to their compatibility in terms of colour, opacity and feel (www.fantin.com).
